

## SPAIN EXPECTS WAR.

ANTAGONISM TO UNCLE SAM  
DAILY GROWS STRONGER.Repeated Meetings of Naval and  
Military Officers to Consider a  
Plan of Campaign.

PUBLIC INSULTS TO AMERICANS

AN APOCRYPHAL LETTER FROM  
THE "SULTAN OF MOROCCO."Unfavorable Comment Because Gen.  
Woodford Resides at Hotel.  
An Interview with the  
Duke of Tetuan.

[BY THE TIMES SPECIAL WIRE.]

LONDON, Sept. 19.—[Special Dispatch.] There is no use in denying that the situation in Spain is rapidly going from bad to worse. It is a matter of fact that the antagonism to the United States is growing stronger and is to some extent encouraged by the attitude of the government. An unfavorable construction is put upon the most trifling acts of Gen. Woodford. There is even unfavorable comment upon the fact that he has decided to live at a hotel for four months, on the pretext that he requires time to select a house to suit his family. This is interpreted to mean that he knows that his instructions are likely to lead to a rupture, and he wants to be able to depart without difficulty.

Public insults to Americans are becoming very common. The Imparcial, the principal journal of Madrid, printed a leader Thursday in the form of an apocryphal letter from the Sultan of Morocco to President McKinley, begging him to communicate the secret how he manages to escape the consequences of American outrages on Spain in Cuba, while he, the Sultan, is frequently compelled to pay for outrages by the Rif and other tribes.

According to dispatches printed here, an official denial has been given to the Washington report of a plan of campaign devised there for use in the event of war with Spain. It is evident there is some delicacy on the American side in referring to such a contingency, while everybody in Europe who has given thought to the matter regards it as near. That delicacy is not shared by Spain. People there talk of such a war as virtually inevitable, and it is beyond dispute that the government has been maturing a Spanish plan of campaign, whatever Washington has been doing or forgetting to do. For a month past, there have been repeated meetings at San Sebastian and Madrid of naval and military officers, who presumably constitute a council of war. The polite thing is to say the war experts met to talk of the affairs in Cuba and the Philippines, but the fiction is well understood.

TETUAN AND WOODFORD.

An Interview Which Caused Some  
Excitement at Madrid.[ASSOCIATED PRESS NIGHT REPORT.]  
LONDON, Sept. 19.—[By Atlantic Cable.] A dispatch to the Times from Madrid says:

"The conference between United States Minister Woodford and the Duke of Tetuan lasted about two hours, and has given rise to a good deal of excited surmise. Nothing appears to have been said, however, beyond the interchange of customary courtesies and mutual assurances of pacific intentions and good-will. The conversation was carried on through a high official of the Foreign Office, as interpreter."

BRITISH MARKETS.

Future of Money Depends on the  
Gold Withdrawals.

[ASSOCIATED PRESS NIGHT REPORT.]  
LONDON, Sept. 19.—[By Atlantic Cable.] The condition of the money market remains substantially unchanged, though discount is somewhat easier. The future of the market depends mainly upon the question of gold withdrawals for the United States. The banks will doubtless advance the rate in the event of an important demand, otherwise the present low discount rate promises to continue. Silver is firmer on the strength of Indian purchases. There are rumors that the Indian Council is buying for coinage, and that the price has risen sharply in India of late as fears of an import duty have subsided.

There are signs of revival in stock exchanges. Both speculative and investment business is enlarging; and the tendency is distinctly upward. Consols, colonials and home railways are all higher than a week ago. The depression in Spanish securities is the principal feature in foreign markets.

American railway securities have further advanced. The English purchasers of high-priced stocks are selling to realize, but in so doing are making the demand for low-priced shares. Union Pacific leads the list in increase with 4%. Central Pacific, Lake Shore and New York Central with 3%. Missouri Pacific, 2%; New York, Ontario and Western, 2%; New York and Erie preferred, 3%; Denver, 3%; Grand Trunk guaranteed has advanced 2%; Grand Trunk firsts, 2; seconds, 2%, and thirds, 2%.

MANCHESTER STUFFS.

[ASSOCIATED PRESS NIGHT REPORT.]

MANCHESTER, Sept. 19.—The market for yarns is poor and much overstocked. The outlook for cloth is somewhat more promising. There is a fair business with China and with South America. The Levant and India continue to make inquiries, but this far business with those sections has not been large. The more encouraging crop reports from India, South America and the Levant arouse strong hopes of a better trade at an early date. The home trade is still interfered with by the large numbers of idle hands who effect the retail trade unfavorably.

An important strike among the weavers of Lancashire is likely to occur soon, as the men are determined to resist the proposed reduction of wages. Advice from the continent shows that there is no improvement in either French or German markets. Manufacturers will be compelled to reduce the price 10 percent.

GRAIN AND FLOUR.

[ASSOCIATED PRESS NIGHT REPORT.]

LONDON, Sept. 19.—The harvest is practically finished and farmers are getting anxious. Wheat is flat, September and October sold at 35s 4d net. The 4d was a record for the winter wheat. Flour is a shilling lower than it was a week ago; maize also is a shilling lower. Maize, northern north, was off-

fered for 18s 6d, Atlantic ports, 16s, 11s 4d. Barley was firmer, American selling at 16s 4d. Oats are 6d cheaper, clipped mixed oats, September, are quoted at 12s.

THE TREATY OFF.

Fort Hall Tribes Stand Out for Four  
Dollars an Acre.

[ASSOCIATED PRESS NIGHT REPORT.]

POCATELLO (Idaho), Sept. 19.—The negotiations for the purchase by the government of the lower end of the Fort Hall reservation have come to a sudden end. The chiefs and head men of the tribes were ready and anxious to sign the agreement before Commissioner McNeely received the telegram yesterday from the Commissioner of Indian Affairs, saying that the proposed price of \$4 per acre was too high, and was not to be paid. As a result, the treaty has been declared off by the Indians. The government will give them time to reconsider the matter.

CONTUMACIOUS BISHOP.

CABINET CRISIS IN SPAIN MAY FOLLOW  
HIS ACTION.

[ASSOCIATED PRESS NIGHT REPORT.]

MADRID, Sept. 19.—[By Atlantic Cable.] Fears are expressed in well-informed circles that a Cabinet crisis may result from the contumacy of the bishop of Majorca, Balearic Isles, who, in defiance of the order of the archbishop, has persisted in his excommunication of Señor J. Reverte, the Spanish Minister of Finance, for taking possession of the church treasure in his diocese.

[ASSOCIATED PRESS NIGHT REPORT.]

MADRID, Sept. 19.—[By Atlantic Cable.] Fears are expressed in well-informed circles that a Cabinet crisis may result from the contumacy of the bishop of Majorca, Balearic Isles, who, in defiance of the order of the archbishop, has persisted in his excommunication of Señor J. Reverte, the Spanish Minister of Finance, for taking possession of the church treasure in his diocese.

Several influential prelates approve the course of the bishop. Their attitude, which is absolutely opposed to that of all the members of the Cabinet, who have appealed to the Pope against the decree, through the Papal nuncio, has raised a complicated issue between the ecclesiastical and political authorities.

The Cabinet relies upon the dictum of the nuncio, that the bishop has no jurisdiction over the Minister, and upon his further assurance that the Pope will undoubtedly censure the bishop. The notorious sympathy of the bishop with the Carlist movement also aggravates the situation.

CHOCK FULL OF EVENTS.

EVERY DAY A SPECIAL DAY AT  
NASHVILLE THIS WEEK.

[ASSOCIATED PRESS NIGHT REPORT.]

NASHVILLE, Sept. 19.—This week promises to be one of the most interesting and stirring during the exposition. Every day is not only a special day, but on several days two and three special events will be in progress at the same time.

Tomorrow the Young Men's Institute of the jurisdiction of Kentucky and adjoining States, will hold exercises.

Tuesday, Irish-American day, is to be made one of the greatest days of the exposition. An immense attendance is promised. There will be a monster street parade, with bands, floats, decorated vehicles, societies and citizens.

On Wednesday, the people of Chattanooga have prepared to come in force, and they have a brilliant celebration programme. Hon. Benton McMillan will deliver the oration. A fine programme has been prepared.

The National Association of Mexican Veterans will meet Wednesday and Thursday. The Society of American Railroad Superintendents will meet on Wednesday, and Thursday the American Forestry Association will meet at the exposition grounds.

Beginning Thursday the National Spiritualists' grand convention will begin work, and will be in session four days. Saturday is Parthenon day, and the programme will be one of attractive features.

SPARKS FROM THE WIRES

Night Dispatches Condensed.

The ministerial organs at Madrid assert that the Spanish Foreign Minister, the Duke of Tetuan, will be soon gazetted as Spanish Ambassador to France. The Duke of Tetuan had long interview yesterday with the Queen and United States Minister Woodford.

Percy W. Smith is dead of heart disease at his home in London. He was 65 years of age. He was the only clerk of Woods and Lothrop, and served as private secretary to Gov. Newland during the latter's administration.

A St. Johns dispatch says the Norwegian steamer *Eugenie*, which went ashore on Grut Island, has been broken into pieces and will be a total loss. The crew escaped, but nothing was saved. They were almost washed off the decks by the heavy seas. The British warship *Cordelia* sailed to inspect the wreck and report as to the practical operations of the life-saving station.

A Constantinople cablegram says Ferrouh Bey, counselor of the Turkish Embassy at St. Petersburg, has been appointed Turkish Minister to the United States in succession of Moustapha Tachin Bey. The foregoing dispatch conflicts with the statement in a cablegram from Constantinople on September 3, that Moustapha Tachin Bey would be succeeded by H. H. Bey, former counselor of the Turkish Embassy in London.

The Ward line steamer *Niagara* from south-side Cuban ports arrived at New York yesterday, after a voyage of 12 days. The ship is said to have been in the harbor for over six weeks. The *Niagara*, on September 9, on entering the harbor of San Francisco, grounded on Colorado shoals. The Cuban pilot was in charge at the time of the accident. An attempt was made to back off the vessel, but without success. Her cargo was discharged in lighters, also her entire supply of coal and the water in her boilers. Finally, the vessel was towed to the wharf by a tugboat, and a powerful tugboat succeeded in hauling the vessel off the shoals, unharmed.

Collided with a Car.

John Henry jumped off a car on the corner of Market and Spring streets last night and stepped in front of a Downey avenue car going in a direction opposite to the car which he had left. The result was that Henry was knocked down and badly bruised about the face and head, but fortunately was not seriously hurt. He was brought to the Receiving Hospital for treatment, but was able to walk home after a short rest.

## BREAK ITS BACKBONE

OPERATORS HOPE TO SETTLE  
THE STRIKE TODAY.Attempt Will be Made at Latimer  
and Anderson and at Cox's  
Mine to Resume.

CAVALRY AND INFANTRY NEAR

PROTECTION WILL BE AFFORDED  
TO HONEST LABORERS.Absolute Quiet in the Pennsylvania  
District Yesterday—Meetings of  
the strikers ortho-  
coming—Inquest.

[ASSOCIATED PRESS NIGHT REPORT.]

HAZLETON (Pa.), Sept. 19.—Absolute quiet prevailed in the entire strike region today. Vice-President Maguire of the Federation of Labor, left for Washington today to attend the meeting of the Executive Council, which is to consider the situation, and George Chance of the United Labor League, went to Scranton for a similar meeting of labor men there.

The only movements among the military were the practice rides of the Governor's and city troops, and the afternoon dress parade.

Tomorrow is looked forward to as a decisive day. An attempt will be made to resume at Latimer, where there will be 1300 men, and at Anderson. There are nearly twenty-five hundred men at the latter place, and they were the first to go out. Many of them wanted to work, but bands of women have prevented them during the past few days. To insure protection of a squadron of cavalry and the entire Eighth Regiment will go to the scene.

The men at Cox's Drift mine are also to decide tomorrow upon staying out or continuing at work. All these places are well guarded by the troops, and if the men are peacefully permitted to resume work, it is thought the backbone of the strike will be broken, and no further violence will result.

The Coroner's inquest will begin on Wednesday afternoon, instead of on Thursday, as first intended.

SUNDAY MASS MEETING.

[ASSOCIATED PRESS NIGHT REPORT.]

SCRANTON (Pa.), Sept. 19.—Nearly five thousand laboring men, mostly miners and mine laborers, attended a mass meeting at Nay-Aug Park today, called by the Central Labor Union. The gathering was quiet and orderly. Among the speakers was Hugh O'Donnell, the Homestead labor leader.

All denounced the Latimer shooting as wanton murder, a brutal outrage and massacre, and suggested law as the present remedy and organization as the safeguard of the future. Resolutions blaming Sheriff Martin and his posse and criticizing Gen. Gobin for allowing unwarranted interference with civil law, were adopted.

THEY DIDN'T RESOLVE.

Meeting of the Social Democracy  
Broken Up by Extremists.

[ASSOCIATED PRESS NIGHT REPORT.]

DETROIT (Mich.), Sept. 19.—A meeting of the Detroit branch of Social Democracy this afternoon attempted to resolve condemnation upon the action of Sheriff Martin and his deputies in firing on the miners at Latimer, Pa., and demanded their trial. They also tried to resolve that Pennsylvania judges who have allowed the shooting of the miners should be impeached.

Several extreme socialists were present and made speeches contending that there should be no appeal to the government in such cases, but that vengeance should be had by the strikers themselves. They tried to shout down the resolutions, and denounced the chairman for appointing a committee to draft them. After a long, hot struggle, the gathering broke up without declaring itself.

FOREIGN BATHERS KITES.

Socialistic Meeting at Buffalo De-  
nouncing Dollar Wheat.

[ASSOCIATED PRESS NIGHT REPORT.]

BUFFALO (N. Y.), Sept. 19.—Meetings of English, German and Polish-speaking Socialists were held here today. Sheriff Martin and the shooting of the striking miners were denounced. The gathering was orderly. Probably two thousand people attended both meetings.

"Dollar wheat" was also denounced, the speakers claiming that the high price meant only dearer flour for the workmen.

SUNDAY NIGHT FIRE.

San Fernando-street Saloon Cleaned  
Out.

[ASSOCIATED PRESS NIGHT REPORT.]

A large Sunday night crowd gathered to witness the big fire which raged last evening from 8 to 9 o'clock in the two-story frame building owned by E. Huber, at No. 1513 and 1529 San Fernando street, and occupied by Charles Timm as a saloon, restaurant and lodging-house. The buildings on both sides were slightly damaged.

Charles Timm said: "My wife and I were in the restaurant and heard a roaring in the bar-room. We rushed in there, and everything was in flames. The fire seemed to come from the vacant building next door. I had just bought it of A. Horn for \$1500. It was insured for \$500 to the former owners. I had not a cent of insurance, and the fire came so quickly we saved only one trunk. My loss is four or five hundred dollars. I have been in business at this stand two years, and will likely start up here again."

Two engines, Nos. 1 and 3, were called into action, with the hook and ladder truck.

The American clipper ship *William S. Mace* arrived at New York yesterday from Honolulu. Capt. Anselmy reported that he sailed down the Pacific on June 15, the vessel called at Atitaki Island, one of the Cook group. The vessel was met by a schooner, bringing fruit and other products of the island. Capt. Anselmy supplied them with clothing, etc. The island has a population of about twelve hundred people, among that number being several American and British missionaries.

The growth of meat shipments from New Zealand is remarkable, and the effect upon the markets of the world is not inconsiderable. The shipments began in 1882, with 1,707,328 pounds. In 1890 they had risen to over 100,000,000, in 1896 to 125,000,000, and last year's shipments reached the amazing total of over 150,000,000 pounds of mutton and 3,500,000 of beef.

Fruit Ranching in  
California, as Seen by a Canadian Visitor.

[Toronto Saturday Night.]

LET us imagine you are in Southern California, and we have taken you to a spot nine miles east of the city of Los Angeles, and three miles south of Pasadena. We turn your eyes toward the east and the mountains, and a little to the left you see Mount Lowe, with its famed incline railway and hotel, rising to a height of 5000 feet. Almost in front of you is Mount Wilson, 7000 feet high, and winding in and out across its steep sides is seen an old trail, by means of which the Indians and early settlers crossed the Rockies, but which now is only used by climbing tourists desirous of obtaining the grand view from its top. Now cast your eyes further to the right, and still nearer to the heavens, and involuntarily they stop at Mount San Antonio, or "Old Baldy," whose snow-capped head reaches an altitude of 11,000 feet above the level of the sea. Leaving the east and facing the north, the west, and south, your eyes are met by ranges of green-covered undulating hills, which in some parts of the country are identified with the title of mountains also. Within this wonderful natural inclosure lies the charming San Gabriel Valley, and nestled in the heart of this valley is the beautiful Santa Junita ranch, which is the present home of the writer.

Here every place, every estate, and every home is called a ranch, and on looking up this word in the dictionary we find that a ranch is a farm. But in the Canadian ranching, fruit ranching in California about as much as a calliflower resembles a calla lily. There are many fine ranches in this part of the country, and as this is a typical one, we will take you over it. First let us look at the house, which is large, externally artistic, and internally abounding in comfort. Around it are beautiful lawns, graceful palms, weird-looking cacti, and stately shade trees, among which are the eucalyptus, the pine, the acacia, the olive, and the varieties. In and around among them all are flowers without number, a prodigious profusion of loveliness, such as you can see under the fairest skies. It is not much to say that all this semi-tropical splendor makes an attractive home. For once at least in our lives we find the English word "home" is inadequate to express the thoughts we feel or tell of the pictures we daily see. But let us move on to the orchard, of which the Almond and Orange are the beginning and the end. There are always oranges. Orange trees everywhere, ever green, and never seeming to rest, for they can bear fruit all the year round. Back there in Canada we thought that an orange was just an orange, and that the English word "orange" was that some were larger or smaller than others. But here we have learned that there are oranges and oranges. Sweets, Valencias, Mediterranean, St. Michaels, Bloods, Mandarins, Tangerines, and last of all and most important, Navel oranges, are growing with the force of a magic wand. Wherever they are, they are everywhere. We write and invite you to pull and taste them at any hour of the day. During the weeks that the trees are blossoming, the air is simply laden with a fragrant odor which is almost intoxicating.

Leaving the oranges for a little, we move on to lemon and grape-fruit trees, peaches, apricots, every variety of peach, loquats, plum trees, fig trees, walnut trees, olive trees, and even banana trees. Then we come to grapes, pomegranates, guavas, quinces, raspberries, blackberries and strawberries. All these fruits are growing on this ranch, and it goes without saying that where they are, they are everywhere. We write and invite you to pull and taste them at any hour of the day. During the weeks that the trees are blossoming, the air is simply laden with a fragrant odor which is almost intoxicating.

## THE WEATHER.

U. S. WEATHER BUREAU, Los Angeles, Sept. 19.—At 5 o'clock a.m. the barometer registered 30.02; at 5 p.m., 29.93. Thermometer for the corresponding hours showed 66 deg. and 84 deg. Relative humidity, 5 a.m., 90 per cent; 5 p.m., 48 per cent. Wind, 5 a.m., east; velocity 2 miles; 5 p.m., west, velocity 4 miles. Maximum temperature, 87 deg.; minimum temperature, 64 deg. Character of weather, 5 a.m., cloudy; 5 p.m., partly cloudy. Barometer reduced to sea level.

## The Times

## ALL ALONG THE LINE.

The use of salt water for sprinkling streets has been advised in many cities, but Santa Monica has tried it and does not find it entirely satisfactory. Salt water might work better on paved streets than on dirt roads, but apparently there are many serious objections to its use.

"A fool there was," and he is still there in Santa Monica, trying to run a paper. Because the Times correspondent described the pitching and rolling of a boat at the Southern Pacific wharf, this superserviceable tool of the company calls upon the citizens of the town to arise and obliterate the correspondent. Santa Monica is a pretty nice little town by the sea, but she is unfortunate in being represented publicly by an outcast of the home for the feeble-minded.

A special policeman shot a man yesterday for running along the street. The man had committed no crime, so far as the policeman knew then or knows now, but the policeman assumed that he had a right to kill anybody who ventured to disobey any of his commands, and he did his best to kill the feeling man. Should the man die, the policeman will be guilty of murder. He is liable to prosecution for assault to murder, for a policeman has no more right than any other citizen to use deadly weapons.

New Mexico is clamoring for admission as a State, and pretending that she is inhabited by people fitted to govern themselves. The people of two towns in New Mexico recently held a mass meeting to oppose the introduction of improved methods of irrigation. They passed resolutions against the construction of canals, and resolved in advance that they will regard as false and fraudulent any signatures that might be appended to any petition in favor of the project. From another country the Territory comes a published statement that no crime's life is safe. The county authorities appear to be the criminals, which is not at all unusual in New Mexico.

## Chainless Bicycles.

Dr. R. C. Carpenter, professor of experimental engineering at Cornell University, has been making extensive experiments on the relative merits of the chain and chainless varieties of bicycles. His deductions are not flattering to the new idea. He says:

"Our investigations are not entirely completed at the present time, but it seems safe to announce that all the tests indicate that no form of gearing can possibly equal the best chain for efficiency and durability. Some of the results of the tests make it interesting and it may be briefly stated that the friction with the best chain varied from one-half to three-quarters of 1 per cent, and this result was obtained with a chain which had been in use on a wheel that had been ridden for more than 2000 miles by a rider weighing nearly 200 pounds. This would serve to show that high-grade chains can be and are made which do not change their form by wear an amount sufficient to effect the friction. Tests were made on a large number of other chains and the friction was found to vary from 2 to 5 per cent, depending upon the condition of the chain, the method of construction and the design. The highest friction we have found, even in the case of an old chain, which did not fit the sprocket properly, did not exceed 10 per cent, although I am willing to concede that a considerable higher friction might in some instances be found."

"Regarding the chainless, extensive investigations have been made from time to time which show the amount of power lost in friction. The very best recorded results with spur gears are very nearly equal to those obtained with the ordinary chain when the gearing is in the best condition and working accurately. In the case of the chainless, the best kind of bevel or spiral gears, a form which must be used in bicycle work, shows about three times the friction of the spur gears, and since two pairs must be used on each bicycle, about four times as much friction as the ordinary chain will be developed, and six to eight times the friction of the very best chains."

"There is another serious objection to the use of gears, arising from the fact that the least change in position of the point of contact of the gear from its normal will cause a great increase in friction and in loss of power over that stated in the preceding discussion. This indicates that the gearing is essentially unfitted for a frame which must, from the very nature of its use, possess great elasticity and flexibility."

"In our investigation the friction of several bicycles running under ordinary conditions were measured. This for the very best wheels under heavy working condition was found to be from 6 to 8 per cent. of the power supplied, which with some of the poorer wheels the friction was 20 to 40 per cent."

"One of the noted manufacturers of high-grade wheels kindly permitted an opportunity of comparing a chainless wheel, which was constructed in the most approved manner, and with the friction reduced to the smallest possible amount, with the same kind of wheel equipped with the best chain. The results were uniformly from 5 to 8 per cent. in favor of the wheel with the chain, or just about the amount that could have been predicted from previous tests of gearing."

"The chainless wheels also develop one extremely bad feature, and as this is inherent in all methods of gearing it may be perhaps worth mentioning. With all the chain wheels the percentage of friction or loss of power remained essentially constant at all speeds, but with a geared or chainless wheel the percentage of friction increased as the speed diminished. This would make the chainless wheel very objectionable for climbing hills, since at that time the speed must be slow and all the power of the rider must be used to propel the wheel forward."

## FOX FAMILY FIGHT.

J. W. FOX, SR., AND J. W. FOX, JR., LITIGATE.

Tableware in a Bed-room Bureau. The Methodist Conference, President Garfield, and the American Flag—Buggy-shed Carried Off by Night.

The bitter quarrel of a large family, elaborated to the most complete and trivial details, is on free exhibition in Department Five of the Superior Court in three suits between J. W. Fox, Sr., represented by Jones and Newby, attorneys, and J. W. Fox, Jr., represented by Lawyers Clarence A. Miller and Goodrich & McCutcheon. About 1887 the two, J. W. Foxes, senior and junior, agreed that Fox, Jr., who was traveling about and making money, should remit the same to Fox, Sr., who would invest it in and about Burbank, and they would divide the proceeds between them.

Decree was taken in the name of J. W. Fox, and as this might mean either of the Foxes, it would enable Fox, Sr., to transfer in Fox Jr.'s absence, and the two Foxes to divide the properties with greater economy in recorder's fees.

Up to some time in 1889 Fox, Jr., claims to have sent Fox, Sr., about \$10,000, but Fox, Sr., says he received about \$3000, and as the venture was generally unsatisfactory, it was agreed to balance accounts by Fox, Sr., turning over all the property to Fox, Jr., so Fox, Sr., put all deeds in the deed box of Fox, Jr.

Fox, Jr., now claims that Fox, Sr.'s home place was covered by this agreement, and should have been transferred to him, but Fox, Sr., says his wife's money paid for the home place. Fox, Jr., claims that Fox, Sr., charged him with the recording fee of the home place, and that his refusal to transfer it with the other properties invalidates the agreement of 1889 to deliver all the property to him.

Fox, Sr., brings suit against Fox, Jr., to foreclose a mortgage upon which an unpaid balance of \$500 is claimed by him, and payment refused by Fox, Jr. Fox, Sr., also brings an attachment suit for taking care of Fox, Jr.'s orange orchard from 1893 to 1895, which Fox, Jr., refuses to pay for.

Fox, Jr., dug up some water pipe from under ground on his own land and sold it, and Fox, Sr., claims it and sues for that also. During the years of peace Fox, Jr., sent Fox, Sr., sundry gifts, and also various articles of vertu and numerous bric-a-brac for storage, and a disproportionate large part of the dispute seems now to be which of these articles were gifts and which were not.

For instance, Fox, Sr., claims some plated knives and forks, worth \$5 or \$6, as gifts and that they were in constant use on his table, but Fox, Jr., claims they were not gifts, nor in constant use on his table. And that when attached the Constable found them in a bed-room bureau drawer. Mrs. Fox, explains this by the statement that she was that time about to go away to a Methodist church conference, and hid them in that unusual repository for tableware. In fear of burglars.

A photograph and frame were claimed by Fox, Jr. Fox, Sr., returned the photo but retains the frame, and it now unfolds a portrait of Garfield.

Fox, Jr., complains that during the controversy he went to bed one night with a buggy shed on his premises, but the place of the morning sun revealed the shed transferred bodily to his father's yard, and the State and Stripes flaunting with insolent flaunts from the ridge-pole thereof, "and it was not the Fourth of July, either."

The total amount involved is about \$4250. The first of the three cases filed has been in court a year this month. The trial has already lasted three days, and is continued till Tuesday. As the Fox family is a large one, divided in as lively sympathetic sides between the bitter disputants, the end is not yet in sight. It is to be hoped, however, that it may be concluded without involving the church, the ex-President's portrait, and the national emblem in serious complications.

## NO GORE SPILLED AFTER ALL.

Bloodthirsty Colored Gentlemen Who Failed to Get Together.

[The Haberdasher:] Two flashy colored boys stood in the hot sun in front of the railway eating-house and looked at each other with their eyes rolled sideways. "Look hyah, you piece o' dahnk meat, got some ponehandled trouble in my poke?" "Waitin' faw you if you eveh come 'round that baby tryin' to undamine me!"

"Slow down, you! You on a slippery road, an' if you don't drive catfish you going to fall right in dat ditch, fus 'tween you knows." "Don't get me started, coon! Don't 'rouse me! I wouldn't like to do it, but I could jus' lay hold of yo' dahnk body and cut it up into rubbah balls. I ain't use the razor faw whole week now, an' it's gettin' uneasy. I can feel it movin' in my pocket an' sayin', 'Mistah, let me get out an' do somethin'.' 'Look hyah, you bettah sing dat ragah to sleep, 'kase you eveh reach faw it you jes' see whole atmosphere full o' nighrah wool, striped shirt and blue hose. You eveh sing dat ragah, you geth'd up in a basket. I got a piece of shiny hardwath in my pocket, an' it shingles away an' low an' evertime it speaks to you it han's you a pound o' lead. Look out faw me, boy!"

"Hush, coon, I really love trouble." "Don't start nothin'! 'Less you want to lose money faw yo' folk. Costs money to plant a coon, yes seh. You don't get dem silvah-handled boxes faw nothin' you seh. Got any o' dem papah cigahs, Henry?"

Henry reached for his package of cigarettes, and the traveler, who had been waiting to see murder done, gave an exclamation of disgust and walked into the railway station.

## Bryan the Passed.

[Tulare Register.] Now that the Bryan pass question was started by the Call, the eastern papers have been looking up the fact and, just as the Register predicted, it has been found that he habitually rides on passes, carries annuals from all the roads in his pocket and beats around the interstate commerce law by having the passes charged to the advertising account of the Omaha World-Herald, in which he is a mere stockholder, unmindful of the fact that annual passes are not given in exchange for advertising for the good reason that, with an annual, there is no knowing how much money he will have been traveling and how much advertising it would take to cover. The whole advertising proposition is, as we have said, only a dodge to get around the interstate commerce law, and Bryan rides on passes through force of habit. We do not know that we think any the less of him on that account, but we have been told that the country that those who can best afford to pay their fares do not do so. Our only objection to him is that he does not admit and acknowledge the fact instead of beating around the bush and making pretense of payment in advertising when no payment is expected and, in most cases, no advertising done. The pass system should be utterly and absolutely abolished.

## PASADENA.

## FUNERAL OF THE LATE MRS. WILLIAM STANTON.

Impressive Services and Large Attendance of Friends—Two Sisters of Charity Injured in a Runaway Accident—A Drunken Husband.

PASADENA, Sept. 19.—[Regular Correspondence.] The funeral of Mrs. William Stanton, who died at her home in Pasadena, was held at 10 o'clock today at the residence of Grace Hill, it was none too spacious to accommodate all who desired to pay their last tribute of respect to one who has been buried in all that tended to better the condition of others, morally or financially.

The services were very impressive, yet simple and without ostentation, and were conducted by Rev. William M. Jones, pastor of the Universalist Church, of which the deceased was a trustee, and by Rev. E. L. Conger, who when Mrs. Stanton was in Pasadena was the pastor of that church.

The ceremony consisted of a responsive service by Rev. W. M. Jones, and the church choir, composed of Miss Elizabeth Jones, soprano; Mrs. B. O. Kendall, contralto; E. Lucas, tenor, and B. O. Kendall, baritone.

Following the responsive service the quartet sang, "We are a People of the Living," and Rev. Jones then spoke feelingly of the deceased, and quoted several appropriate passages from the scriptures. Following his remarks Miss Jones rendered a solo, "Rev. E. L. Conger referred to the beautiful personality of Mrs. Stanton, and the efforts she made to assist the church with which she had associated herself. He spoke of the education she received, and to which she devoted much time. He closed with prayer, and the choir sang, "We are a People of the Living."

The floral offerings were most beautiful. The pall-bearers were John Wadsworth, J. W. Higgs, Walter L. Wootkins, C. S. Christy, John Anderson, Frank C. Jones, and G. W. Stinson, representing the trustees of the Universalist Church, Throp Polytechnic Institute, and the Valley Hunt Club.

The interment was in Mountain View Cemetery.

## FUNERAL OF C. A. TUNISON.

Funeral services over the remains of the late C. A. Tunison, who died at his home on Mercer street on Thursday, were held from 10 o'clock to 11 o'clock today at the residence of Reynolds and Van Nuy's parlors at 2 o'clock, and the remains were interred in the cemetery of Old Pasadena at 3 o'clock.

now perfecting a folding machine for laying the sheets in the folds of the magazine so that the reader may cut all the pages instantly.

Mrs. Edith Kadish of Highland Park lost her house on a railroad accident. She had invested in a new-fangled oil stove lately introduced in these parts. Its explosion scattered burning oil all over the building in reach, and the building was consumed too quickly for any of the valuable contents to be saved. Mrs. Kadish had fortunately withdrawn from the house but a moment before. The loss of house and contents was total, and there was no insurance.

## POMONA.

## Funeral of Miss Johnston Attended by a Great Congregation.

## RANDSBURG.

## THE DESERT CAMP STILL ATTRACTING INVESTORS.

Murderer Davidson Held for Trial. Holding a Mine by Shotgun. Title—Opening of Randsburg's First Public School—News Notes.

RANDSBURG, Sept. 17.—[Regular Correspondence.] Our hot weather is evidently passing. For the last two weeks or more it has been delightfully pleasant, with little or no wind, and only warm enough to be agreeable. The nights are a little cooler than usual.

Travel is beginning to set this way now, and more people are coming than for months previous. Thursday evening Miller sent in an extra stage from Mojave, and it, with the regular, brought twenty-two passengers, while the Kramer stage was equally loaded. Tonight but one coach came in from Mojave, but it was crowded, and during the week more than one hundred people will come into Randsburg, if tomorrow stage is regular.

Many of the people are men looking for investments in mines, while more than half are residents here, who have been out on business or pleasure.

In the abstract office considerable business is being done, and transfers of mines occur every day. Work goes on night and day in the mines, and some very rich ore is being taken out in all parts of the district.

Very many men are here, and, in fact, any able-bodied man who wants work can get it, and at fair wages.

The Osborne boys, formerly owned by the Osborne boys and John Crawford, whose rich strike was made last winter, has now passed to the hands of E. Lee Allen, he paying the Osborne boys and their mother \$1500 for three-fourths of the mine.

This property lies just west of and in line with the Little Butte, Kenyon, Wedge and other mines, and is a very rich one.

There are at least five separate ledges inside the boundaries of the mine, all showing excellent prospects of a very coarse gold.

The Scott murder trial is on again at Bakerfield, and the jury is expected to return a verdict in the case.

A few days ago the man Davidson who shot his wife at Butte avenue in May last, was brought in from Bakerfield for a preliminary trial before Justice Magness.

There is a case of disputed ownership of a mine west of town which is likely to result in a lawsuit.

The trial is likely to result in a lawsuit, and the jury is expected to return a verdict in the case.

A few days ago the man Davidson who shot his wife at Butte avenue in May last, was brought in from Bakerfield for a preliminary trial before Justice Magness.
